

**ALASKA DEPARTMENT OF LABOR
& WORKFORCE DEVELOPMENT**

**Alaska Workforce Investment Board
Policy & Planning Committee Report
October 27, 2009**

The Policy & Planning and Committee met two times since the AWIB meeting in May 2009. The committee worked on the following issues since the last board meeting:

1. Reviewed Training Plan Template from the Workforce Readiness Employment Placement Committee.
2. Forwarded a modified Training Plan to the Exco for approval.
3. Reviewed the process for determining industry priorities and occupation priorities with Research and Analysis.

The committee will look at other states methods for determining industry priorities and occupations priorities. It will work with Research and Analysis to disseminate this information and determine the best methodology for the AWIB's needs.

Regional Advisory Councils

The intent is to have the Regional Advisory Councils and the Regional Training Centers work together in their regions. This will enable both groups to determine what training is available for the occupational priorities developed by the Regional Advisory Councils. The occupational priorities have been updated along with contact information to include regional training center information. It was determined at the last board meeting to identify AWIB cross members to the Regional Advisory Councils and this information is also included on the RAC contact list. All RAC information is behind the RAC tab in the board binder.
